

WHITEPAPER COOKIESWAP

This Whitepaper contains all the essential details about CookiesSwap and its future plans.

About us

INTRODUCTION

CookiesSwap is Decentralized Exchange and yield farm platform on Binance Smart Chain that maintains the same and tested and true liquidity protection mechanism that is so important for investors.

The CookiesSwap team saw a lots of people interested in trading using a decentralized exchange, but currently the transaction fees are high, so CookiesSwap team will solves the main problem that decentralized finance faced in recent past.

AIM

Our main aim is to run a Decentralized Trading Protocol on the BSC Network that will allow users to transact their Funds easily.

It works on the simple principal of the normal trading system but in a safe and hassle freeway.

We Pledge to provide prominent and the best service to the users who put out their trust on us.

We aim in such a way that our Platform will be used as the symbol to resemble safe and secure trading Experience.

We aim to make CookiesSwap one of the easiest and most convenient place for new comers to enjoy the taste of trading.

Introduction

What is CookiesSwap?

CookiesSwap is Decentralized Exchange and yield farm platform on Binance Smart Chain that maintains the same and tested and true liquidity protection mechanism that is so important for investors.

The CookiesSwap team saw a lots of people interested in trading using a decentralized exchange, but currently the transaction fees are high, so CookiesSwap team will solves the main problem that decentralized finance faced in recent past. What can you do on CookiesSwap?

CookiesSwap can be used to trade BEP20 tokens and earn cryptocurrencies through staking and providing liquidity.

FEATURES

CookiesSwap has many Features, it comprises of the most prominent features in the market.

You can do the following on CookiesSwap.

1. Trade BEP20 tokens.
 2. Provide liquidity to the exchange and earn fees.
 3. Stake your LP (liquidity provider) tokens to earn COOK token.
 4. Stake COOK to earn more COOK.
 5. Stake COOK to earn tokens of other projects.
-

Blockchain

INTRODUCTION TO BLOCKCHAIN

The term "blockchain technology" typically refers to the transparent, trustless, publicly accessible ledger that allows us to securely transfer the ownership of units of value using public key encryption and proof of work methods.

The Bitcoin Network is the first successful implementation of blockchain technology.

The technology uses decentralized consensus to maintain the network, which means it is not centrally controlled by a bank, corporation, or government. In fact, the larger the network grows and becomes increasingly decentralized, the more secure it becomes.

The potential for blockchain technology is not limited to bitcoin. As such, it has gained a lot of attention in a variety of industries including: financial services, charities and nonprofits, the arts, and e-commerce.

BINANCE SMART CHAIN NETWORK

Binance Smart Chain (BSC) is a blockchain that runs in parallel to the Binance Chain. BSC boasts smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The design goal here was to leave the high throughput of Binance Chain intact while introducing smart contracts into its ecosystem.

Both blockchains operate side-by-side. It's worth noting that BSC isn't a so-called layer two or off-chain scalability solution. It's an independent blockchain that could run even if Binance Chain went offline. That's because both chains bear a strong resemblance from a design standpoint.

Some of the benefits of Binance Smart Chain include:

- A rich and growing digital asset ecosystem powered by Binance DEX, the leading decentralized exchange
 - Cheap transaction fees that reach as low as 1 cent
-

- High performance with a network capable of producing a block every 3 seconds
- Cross-chain DeFi mechanisms that increase DeFi interoperability
- A supportive Binance ecosystem that funds and bootstraps many DeFi projects
- A growing ecosystem of millions of users across Binance.com and Binance DEX
- A network of major crypto projects already collaborating with BSC

Why Binance Smart Chain (BSC)?

In very simple terms, why would we want to drive a slower car that costs more to run? We're all about gamification, so we want to maximize the feedback loop of earning, staking, and earning again: BSC's superior speed and much (much much) lower transaction fees let us do this.

While BSC might not have the level of adoption Ethereum does at current, we believe in Binance's ability and drive to get it mighty close in the foreseeable future.

Faster. Cheaper. Sold.

BEP-20 TOKEN

BEP-20 tokens are tokens running on Binance Smart Chain capable of smart contracts. Essentially, it is the Binance Smart Chain version of ERC20 tokens.

BEP-20 is a token standard on Binance Smart Chain that extends ERC-20, the most common Ethereum token standard. You can think of it as a blueprint for tokens that defines how they can be spent, who can spend them, and other rules for their usage. Due to its similarity to Binance Chain's BEP-2 and Ethereum's ERC-20, it's compatible with both.

One could equally create a native asset as a BEP-20 token, or even peg tokens from other blockchains to make them usable on Binance Smart Chain. Like BEP-2 tokens on Binance Chain, BEP-20 token transfers are fuelled with BNB. This provides an incentive for validators to include the transactions in the blockchain, as they'll collect the BNB as a fee for their troubles.

Events

ROAD MAP

Join us on our Journey to revolutionize the world with the power of Blockchain technology.

ROADMAP

- **MARCH**

Launch airdrop

Launch TokenSale

- **APRIL**

Launch DEX swap

Launch Stake reward

Launch Farm

Listed PancakeSwap

Listed Hotbit

- **MAY**

Launch trading competition

Listed on MXC

- **JUNE**

Listed New Exchange

Opening Launchpad.

- **JULY**

New Partners

Launch stake reward

Token buy back

- **AUGUST**

Event hold COOK

Listed New Exchange
New Launchpad

- **SEPTEMBER**

New Launchpad

New Partners

- **OCTOBER**

COOK rewar for CookiesSwap trader

Token buy back

- **COMING SOON**

Token Governace

CookiesSwap has its own Crypto Currency that works on the Binance Smart Chain Network, this one of the key features of our project.

What is COOK Token?

COOK is a decentralized Token built on the Binance Smart Chain network that offers a modularized and modern way to give benefit to all involved users.

Its aim is to bring businesses and developers together to solve real world problems.

COOK Token is a BEP-20 Token or Cryptocurrency that works on the Binance SmartChain Network.

COOK is the Native token of the CookiesSwap Platform

TOKENOMICS

Token Name: CookiesSwap

Ticker Symbol: COOK

Decimal: 18

Contract Address: 0x030839000f297a1471f83b568eeb51c10afeeefe

Total Supply: 180,000,00 COOK

Token Type: BEP-20

Tracker: BSCScan

1 COOK Price: (\$0.01)

TOKEN ALLOCATION

Tokens will be distributed on the basis of some particular events. All the events are listed below including a graphical chart for better understanding.

TOKEN ALLOCATION

Tokens will be allocated as shown in the chart above.

AIRDROP & BOUNTY

2% Tokens will be used for Airdrops and Bounty.

Private Sale

10% Tokens will be Sale.

Public Sale

20% Tokens will be Sale

DEVELPMENT

5% Tokens will be used for Development.

TEAM ADVISOR

3% Tokens will be used for Team Advisor

LIQUIDITY & STAKING REWARDS & FARM

60% Tokens will be used for Liquidity and Staking Rewards and Farm

TOTAL SUPPLY

180,000,000 COOK Token.
